Investment Composition Continued

Is this investment right for me?

This investment may be right for you if you:

- seek capital protection;
- have an investment horizon of 3 years or longer;
- wish to diversify your portfolio;
- don't plan to withdraw your investment prior to maturity;
- agree to forego portion of the guaranteed return provided by conventional term savings to enjoy a higher potential return.

How does this solution differ from conventional term savings?

This guaranteed investment differs from conventional term savings in that it does not provide a pre-determined return.

Return on the investment is based on the appreciation of the benchmark securities and can only be known at maturity. Return could be nil at maturity.

How are returns calculated?

Up to the issue date, your investment generates interest at a max annual compound rate of return of 4.77% (3 Year Term) and 6.81% (5 Year Term). Between the issue date and the maturity date, the return is based on variations in the benchmark prices, up to a maximum cumulative return of 15.00% (3 Year Term) and 39.00% (5 Year Term). To reduce the effect of a potential market pullback, we factor in the average of the monthly price readings during the last three months of the term.

This investment is not eligible for dividends paid on the benchmark securities.

Return on the investment is not affected by changes in exchange rates even if prices are published in foreign currencies.

For full details on how return is calculated, please see the Investment Agreement.

Variable return is based on changes in the prices of the benchmark securities and, unless a minimum return is specified, the return could be nil at maturity. Your capital is guaranteed at maturity.

What happens when my investment matures?

Shortly before maturity, you will receive a reminder by mail or via AccèsD. At maturity, unless you give other instructions to your advisor or in AccèsD (if your investment is eligible for online renewal), your investment will be automatically reinvested in a similar product with comparable terms and conditions.

Can I redeem my investment before the maturity date?

The Investment Agreement does not provide the option of converting or redeeming this investment before maturity.

What happens during market upheavals?

Desjardins reserves the exclusive right to determine the appropriate measures to be taken in such circumstances. For example, if trading is suspended, the caisse could choose to postpone the date at which the starting index value of the investment is taken into account.
